

PROTECT, REPAIR and BEAUTIFY

During the summer, our hair is exposed more than usually to the UV light, salt and chlorinated water and mechanical aggressions.

Whilst we will all be sure to top up the sun tan lotion, sun care shouldn't stop at your skin. It's important to remember that our hair also needs protecting when exposed to the sun.

Kérastase has designed Soleil to provide sublime hair protection under the sun. Please ask us for a consultation, product advice or treatment advice.

Here we are, Summer!

This is more like it, hitting temperatures of 30 degrees in July/August and hopefully September, just how a summer should be.

Now is the time to make everyone aware of the harmful effect of the sun and what it can do to your skin.

What are the consequences of the sun?

Even if it's cloudy or overcast, ultraviolet rays are still attacking your skin, therefore we should all be wearing sunscreen all the time.

UV RAYS and BLUE LIGHT from the sun on the skin can cause :

Dark spots , Deep wrinkles , Lack of firmness

Using Guinot's latest innovation, Hydraderm Cellular Energy Machine we can think about preparing and repairing your skin for this sunny weather.

Hydraderm Longue Vie Soleil Treatment

Preparation Treatment- Face (Pre Sun)

This treatment helps effectively prepare the skin before sun exposure to maintain youthfulness and prepare for tanning.

Repair Treatment - Face (After Sun)

This treatment helps effectively repair and regenerate the skin after sun exposure. It soothes the skin and restores youthfulness.

We have two fantastic ranges of sun products from Guinot and Thalgo which are both formulated and manufactured in the same conditions as medicine for the skin.

Thalgo and Guinot's anti-ageing sun care range offers twofold protection against the sun's harmful effects and skin ageing.

Both ranges compliment sun protection by preparing, repairing and soothing the skin and enhancing your tan.
