## Skin Routines

**GUINOT**  
INSTITUT • PARIS

**AN ANTI-AGEING REVOLUTION**  
3 essential steps for perfectly healthy skin

1. Apply an **eye contour** product to reduce wrinkles and puffiness around the eyes.
2. Apply a **serum** that repairs and renews the skin deep down.
3. Apply a **cream** that energises your skin and boosts cellular activity.

It is most important to look after our skin, we all want to slow down the ageing process if we can help it.

The human skin is the body's largest organ and requires regular attention to stay young, blemish-free and healthy.

Its important we take close care of looking after the delicate skin around our eyes, the surface of the skin and deep in the layers of skin which is why we should be using face and eye creams as well as a seasonal serum.

**Purchase a eye cream, a serum and a face cream altogether and receive 15% off all 3 products. This month only!**
